# About us

The largest campaigning organisation for Palestinian rights in Europe.

We are a community of people working together for peace, equality, and justice and against racism, occupation, and colonisation. We are united in our belief that Israel's flouting of international law, continued military occupation of Palestine, and systematic discrimination against Palestinians is unacceptable; so together **we take action**. From lobbying Parliament and supporting students on campuses, to partnering with trade unions and targeting companies complicit in Israel's apartheid regime, our campaign is multi-faceted and far-reaching. **You should join us.**
